Matson Ground Estate Company Ltd: Holiday Accommodation Covid 19 Risk Assessment - UPDATED

Date	October 2020
Users	All Matson Ground staff; housekeeping staff; holiday guests
Assessor	R Thomas
Review	As necessary in response to Government or Public Health England updates

Covid-19 is a new illness that can affect your lungs and airways. It is caused by a virus called Coronavirus. Symptoms can be mild, moderate, severe or fatal.

COVID-19 is a disease which is caused by the SARS-CoV-2 virus, which can be passed via respiratory secretions (i.e. saliva and faeces), and which can successfully live for up to 2 to 3 days on certain surfaces. It is an “enveloped” virus, meaning that it is surrounded by a protective layer of fats and proteins.

COVID-19 can be transferred via hands from one surface to another. By touching a surface which has traces of COVID-19 on it, and then touching your face or eyes, you may become infected. COVID-19 can live on some common household surfaces for up to 3 days. Information and knowledge are evolving all the time. Currently it is thought that the virus can live for up to:

- 2-3 hours in the air
- 4 hours on copper
- 24 hours on cardboard, glass and metal and soft furnishings.
- 2 or 3 days (72 hours) on plastic and stainless steel.

COVID-19 is a public health emergency. Everyone needs to assess and manage the risks of transmission, and in particular Matson Ground Estate Company should consider the risks to their staff and customers.

This is a **detailed Risk Assessment** for addressing the current Covid-19 situation within the Matson Ground Estate Company Holiday Lets. In particular, the cleaning protocol and hygiene measures taken to identify potential risks and the active steps needed to mitigate them, thereby reassuring guests that their stay will be safe and clean. Further information can be found here:

<https://www.gov.uk/government/publications/covid-19-decontamination-in-non-healthcare-settings/covid-19-decontamination-in-non-healthcare-settings>

Limits on the number of people you can see socially have changed. From 14 September you must not meet in a group of more than 6.

By signing the terms and conditions when booking, guests are agreeing to abide by the 'Rule of 6'

Police will have powers to enforce these legal limits.

<https://www.gov.uk/government/publications/coronavirus-covid-19-meeting-with-others-safely-social-distancing>

Additional information has been taken from '**Cleaning Protocols for Self-Catering Properties and Short Term lets in the Context of Covid-19**' by The Professional Association of Self-Caterers (PASC) and '**Guidelines for Rural Tourism Operators**' by the CLA. Further advice from the Government can be found here:

<https://www.gov.uk/guidance/working-safely-during-coronavirus-covid-19/the-visitor-economy>

<https://www.gov.uk/guidance/working-safely-during-coronavirus-covid-19/hotels-and-other-guest-accommodation>

Recent advice on Outbreak Management has been circulated to Hospitality Sector providers. Details can be found here:

<https://www.gov.uk/government/publications/reporting-outbreaks-of-coronavirus-covid-19/covid-19-early-outbreak-management>

The number of our Public Health England Health Protection Team for our Area is: **0344 225 0562**

This Risk Assessment will be shared with guests and staff and can be found on our website for anyone to access.

Basic steps for undertaking this risk assessment are as follows:

- **Look** for the points of transmission for Covid-19 in the properties i.e. the touchpoints.
- **Decide** the likelihood of transmission via identified touchpoints.
- **Evaluate** whether the current protocol is sufficient or if 'reasonably practicable' adjustments need to be made.

- **Record** a simple list of guidance points for the Housekeepers
- **Review** as further information or guidance is received, or circumstances change.

Communication of cleaning protocols and training in these will be provided by our Housekeeping Service: <http://www.crystalcleancumbria.co.uk/>
Matson Ground Holiday Cottages fulfil the criteria for the 'Good To Go' Visit Britain Accreditation.

This Risk Assessment will be regularly reviewed and continuously edited as understanding of the virus improves, government guidance changes and advice is passed on to us as accommodation providers.

Guidelines for Cleaning

The following basic steps will minimise the risk for people responsible for cleaning, whilst ensuring the accommodation is safe for new guests:

1. Ask guests to air the property during the stay and to strip beds on departure.
2. Provide the correct protective clothing and cleaning products for all housekeeping staff.
3. Housekeepers should adhere to the following process:
 - a. Ensure the rooms/property is ventilated whilst cleaning.
 - b. Understand the cleaning level required and have the appropriate equipment.
 - c. Wear the appropriate protective clothing (PPE)

Guidance for contact with Guests

Contact with guests will be kept to a minimum, adhering to current social distancing guidelines. Where contact is essential, staff will maintain a safe social distance, or wear a face mask if within 1 metre. Time spent within 1 metre should be limited to 15 minutes and all effort should be made to maintain 2 metres where possible.

Contact-free check-in is available in all properties. Key safes and keys will be sanitised between each stay.

All relevant information that guests need ahead of their arrival, will be available on the Touch Stay App, or sent to the guest by email. Details of how to access this information will be sent to all guests. All paper documentation and welcome packs including Visitors books will be removed from the property and brief guidance on the use of appliances will be left as a laminated, wipeable sheet.

In order to comply with social distancing rules, only essential maintenance will be undertaken during a guest's stay.

What to do if a staff member develops COVID-19 symptoms

If a staff-member displays symptoms of Coronavirus or live in a household where someone else has symptoms, that person must not enter the rental property.

COVID-19 Government guidance for the public states: “the most common symptoms of coronavirus are recent onset of a continuous cough or high temperature or a loss of, or change in, normal sense of taste or smell”.

If staff have these symptoms, they must stay at home for 7 days if living alone, or 14 days if living with someone else.

If a member of staff develops symptoms at work, they must be sent home and follow Government “stay at home” guidance.

Disinfect any touch points that may have been infected by a contaminated person.

HAND WASHING STILL REMAINS THE MOST EFFECTIVE WAY OF STOPPING THE SPREAD OF THE VIRUS

Further guidance on handwashing:

<https://www.nhs.uk/live-well/healthy-body/best-way-to-wash-your-hands/>

For general guidance on staying safe outside of your home: <https://www.gov.uk/government/publications/staying-safe-outside-your-home/staying-safe-outside-your-home>

Washing your hands

While coronavirus is not likely to survive for long periods of time on outdoor surfaces in sunlight, it can live for more than 24 hours in indoor environments. Washing your hands with soap and water for at least 20 seconds, or using hand sanitizer, regularly throughout the day will reduce the risk of catching or passing on the virus.

Covering your face

Coronavirus is carried in the air by tiny respiratory droplets that carry the virus. Larger droplets can land on other people or on surfaces they touch while smaller droplets, called aerosols, can stay in the air indoors for at least 5 minutes, and often much longer if there is no ventilation. Face coverings reduce the dispersion of these droplets, meaning if you're carrying the virus you're less likely to spread it when you exhale.

Making space

Transmission of the virus is most likely to happen within 2 metres, with risk increasing exponentially at shorter distances. While keeping this exact distance isn't always possible, remaining mindful of surroundings and continuing to make space has a powerful impact when it comes to containing the spread.

While coronavirus deaths have significantly reduced, the virus is still circulating in communities and impacting people of all ages across the UK. 'Hands. Face. Space' are simple but vital behaviours that have the power to protect the public from both the short and potential long-term impact of coronavirus. As part of a new campaign, a video has been released by The Government to show exactly how coronavirus spreads indoors. With people expected to spend more time inside during the winter, the film – produced with the help of scientific experts – encourages the public to follow simple steps to reduce the risk of infection.

Guide to cleaning different surfaces

According to National Institutes of Health (NIH) studies, Coronavirus can live for up to 2-3 days on plastic and stainless-steel surfaces. Since these materials make up many of the things which we regularly touch on a day to day basis, such as light switches and taps, it is vital to disinfect surfaces to reduce the possible risk of transmission between people.

Surfaces: <ul style="list-style-type: none">• be aware of where the surface is• kitchens need to be safe for foodpreparation.	<ul style="list-style-type: none">• Initial clean with general detergent or hot soapywater• Sanitise with any of the following:<ul style="list-style-type: none">virucide disinfectant70% ethanol sanitizing liquid
Toilets & Bathrooms	<ul style="list-style-type: none">• Immediate clean with either:<ul style="list-style-type: none">Virucide disinfectant70% ethanol sanitizing liquid
Textiles – Linens, towels etc	<ul style="list-style-type: none">• Hot wash cycle (60 degrees)• Regular laundry detergent

Housekeepers Check List for Cleaning

All surfaces are to be cleaned first, then disinfected

Consideration should be taken to address the impact of children as well as adults: touching lower wall heights and parts of furniture.

Area to be cleaned	Notes
Entrance	To be done on arrival and last thing before departing
Key safe box cleaned	
Keys cleaned	
External handles wiped and disinfected	
Communal Areas	Concentrate on areas most likely to be touched at adult and child shoulder level
Internal doors and door furniture wiped and disinfected	
Wipe down walls (children's handprints)	
Light and power switches wiped and disinfected	
All Surfaces wiped and disinfected	
Bannisters wiped and disinfected	
Windows latches and stays wiped and disinfected	
Floors hoovered and sprayed with virucide disinfectant mist	
Living Spaces	Change plastic bags for all remote controls
Electrical equipment, wifi hub wiped down	
remote controls wiped down	
Soft furnishings and curtains sprayed	
Mirrors cleaned	
Windows latches and stays wiped and disinfected	
Carpets hoovered and sprayed with virucide disinfectant mist	
Hard flooring hoovered and mopped with virucide disinfectant	
Empty Bins and disinfect	
Kitchen	Doors and door furniture wiped and disinfected

High level surfaces dusted	
Light and power switches wiped and disinfected	
All surfaces and furniture, including skirting boards wiped and disinfected	
Windows latches and stays wiped and disinfected	
Hard flooring hoovered and mopped with virucide disinfectant	
Empty Bins and disinfect	
Washing machine / dish washer / microwave / kettle / toaster: clean and sanitise doors, handles and controls	
Oven and hob: clean and disinfected surfaces, doors, handles and controls	
Fridge: clean and disinfected inside and out, including handle	
Pans, crockery, utensils ALL to be washed in the dishwasher	Every item to be run through a short cycle
Drawers and cupboards wiped and disinfected	
Floor hoovered and mopped with virucide disinfectant	
*Clean and disinfect highchair if known to be used	
Bedrooms	
Internal doors and door furniture wiped and disinfected	
High level surfaces dusted	
Light and power switches wiped and disinfected	
All surfaces and furniture, wiped and disinfected	
Drawers and cupboards wiped and disinfected	
Soft furnishings and curtains sprayed with virucide disinfectant mist	
Mirrors cleaned	
Windows latches and stays wiped and disinfected	
Carpets hoovered and sprayed with virucide disinfectant mist	
Empty Bins and disinfect	
Strip beds (if not already done)	Include mattress and pillow and duvet protectors DO NOT SHAKE THE LINEN remove in a plastic bag.
Bathrooms	
Internal doors and door furniture wiped and disinfected	
High level surfaces dusted	
Light and power switches wiped and disinfected	
Clean tiles	
Clean shower / bath / sink including pedestals and splashbacks	
Clean and sanitise taps	
Clean plugholes and pour disinfectant down	

Clean and sanitise toilet bowl using a toilet brush to agitate the cleaning process and include under the toilet rim	Keep toilet lid closed when flushing to avoid spray of droplets.
All surfaces and furniture, including skirting boards wiped and disinfected	
Soft furnishings and curtains sprayed	
Mirrors cleaned	
Windows latches and stays wiped and disinfected	
Carpets hoovered and sprayed with virucide disinfectant mist	
Hard flooring hoovered and mopped with virucide disinfectant	

MAINTENANCE	
Outside Space	
Disinfect bin lids	
Spray outdoor furniture and any touch points on entrance gates	
Clean Barbeques	Replace grill if used and rotate with clean ones from store
Log Baskets	
Refill with one bag for use	A small amount of Additional wood can be kept in outdoor buildings and is free for the guests to use. Replenish with each stay if used.
First Aid boxes/Biohazard Kits	
If left out by guest check if any items need replacing	Missing items to be reported to replace
